This is an electric rate survey done across Pennsylvania and is completed yearly by an electrical engineering firm and shared at the Pennsylvania Municipal Electric Association Conference. It compares rates all across Pennsylvania. The first group compared are all municipalities (of which Mont Alto is one) which own their own electric system. You will note that Mont Alto has the lowest rate at \$ 98.70 per 1,000 KWH. We come in lower than Chambersburg which actually generates some of their own electricity. You will note the next group of figures are averages across PA for the regions and lastly for the Public Utilities. Again, Mont Alto rates are the lowest. We are very proud of the fact that we have been able to negotiate contracts that keep the electric rates here in Mont Alto at the lowest rates across all of Pennsylvania. In July we begin a new 5 year contract again with a very low locked in rate. I know many times you feel that your electric bills are high, but please remember this chart and remember that your rates are in reality, the lowest in Pennsylvania.
